

## Registrations

Professional Architect – New Hampshire

## Education

Bachelor of Architecture, Syracuse University

# Jonathan Smith, AIA

Jonathan has become the lead Project Architect for many of the firm's medical and healthcare projects. Jonathan's strength lie in his nature of being a 'details' oriented person, excellent in the forecast and execution of work efforts, and a keen eye when it comes to being able to wrap your arms around and understand the dynamics of very large and complex projects.

Jonathan's daily responsibilities include the coordination of design, interacting between consultants and contractors, providing specific technical support, consultant coordination and client interaction. Jonathan's role lies in the execution of the architectural design, consultant coordination, technical support and oversight of the construction documents and specifications. Ten years with Warrenstreet, serving in many different roles, has allowed Jonathan to develop his own personal approach to client service, one of thoroughness and caring. Recently, Jonathan volunteered to actually assist in the move residents into a new project. He spent the day riding the ambulance back and forth, assuring each resident a smooth transition into their new home.

In addition to his ongoing project commitments, he oversees all of the firm's IT needs. Jonathan continues to be the go to guy, when all things seem to be going south. Jonathan is one of the founding owner-members of the Warrenstreet Cooperative.
