Professional Civil Engineer - Massachusetts and Washington

Education

Bachelors of Civil Engineering, Lehigh University
Masters of Architecture, University of Washington

Robert Doyle, PE

Rob brings to the Warrenstreet team nearly 25 years of project management experience. He is a Professional Civil Engineer with a strong background and focus on large scale site development. His training as both an architect and civil engineer brings a unique perspective to early site feasibility for a majority of the projects within the office.

Rob practiced as a civil engineer for more than 10 years in both Massachusetts and the State of Washington. Working for A/E firms and being exposed to architectural design he decided in 1997 to pursue a graduate degree in architecture from the University of Washington. Rob returned to New England in 1999 and has been with Warrenstreet for more than 9 years. He is a founding owner-member of the Warrenstreet Cooperative.

Rob talents and strong background in both site and building design allows for his involvement at a more technical advisory level from initial project concept through construction administration. Rob brings particular expertise in site analysis and master planning and project development. Project Responsibilities include design, coordination of consultants, and technical support in the area of contract documentation.
