## Todd Hooper, Intern

Todd is involved in many phases of project development, from schematic design, to office suite layouts all the way through to construction documents and construction administration. He is always willing to jump in and help with any aspect of a project to make sure that it is documented correctly and completed on schedule. Todd's daily responsibilities lie in a technical support role, researching and clarifying proper documentation that supports the architectural design intent of many of Warrenstreets projects.

Todd has ten years of professional experience, involved in many areas of architectural disciplines. Before coming to Warrenstreet Architects, Todd worked for Michael McCloskey Design Group located in the seaside town of Marblehead, Massachusetts. The primary focus of work revolved around residential design, from large scale ocean front homes to alterations and additions to homes throughout the North Shore of Massachusetts.
